PROFESSIONAL EXPERIENCE

Full Stack Developer | YNAPS

Remote • Mar 2022 - Jul 2026

- Designed and developed custom web applications, CMS modules, e-commerce features, and administration dashboards for client projects.
- Built CodeIgniter and Laravel workflows covering authentication, reporting, file uploads, dynamic content, REST APIs, integrations, and database-driven modules.
- Translated client requirements into maintainable backend and frontend features while resolving UI, performance, and functionality issues.
- Developed responsive interfaces and supported projects through deployment and maintenance.

Full Stack Developer | Tamkeen International Co.

Remote • Jul 2020 - Sep 2024

- Developed and maintained responsive web applications for multiple industries and client environments.
- Created role-based dashboards, scalable backend modules, and e-commerce functionality using CodeIgniter and MySQL.
- Improved reliability through testing, validation, database management, debugging, and clean coding practices.
- Delivered client-focused features from planning and implementation through deployment.

PHP Developer | Illustrious Tech

Karachi • Dec 2019 - Jul 2020

- Collaborated with designers and senior developers to implement frontend and backend features for client websites.
- Managed feature work and resolved performance and functionality issues across corporate web projects.

PHP Developer | Cloudesk Solutions

Karachi • Feb 2019 - Dec 2019

- Built client projects from requirements while managing database structure and website functionality.
- Supported feature releases, code updates, deployments, database maintenance, and technical specifications.
